***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-49, 274-315, and 506-509, drawn to computer systems, methods, and a computer program product for recommending an optical treatment protocol, classified in class 702, subclass 19.
- II. Claims 50-65 and 316-331, drawn to a computer system and method to predict progression of a biological process in a patient, classified in class 702, subclass 19.
- III. Claims 66-117 and 332-349, drawn to systems and methods for modeling thrombopoietic lineage in an individual, classified in class 703, subclass 11.
- IV. Claims 118-167 and 350-399, drawn to systems and methods for predicting progression of thrombopoiesis and trombocytopenia, classified in class 702, subclass 19.
- V. Claims 168-201 and 400-433, drawn to systems and methods for modeling neutrophil lineage in an individual, classified in class 703, subclass 11.
- VI. Claims 202-233 and 434-465, drawn to a system and methods for predicting progression of granulopoiesis, classified in class 702, subclass 19.
- VII. Claims 234-247 and 466-493, drawn to a computer system and method for recommending an optimal treatment protocol for cancer using drugs, classified in class 128, subclass 920.
- VIII. Claims 248-273 and 494-505, drawn to computer systems and a method for predicting the progression of cancer in patients, classified in class 128, subclass 920.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to systems and methods for performing different functions. The methods of each of Group recite different steps, use of different products, and are directed to different results. In addition, the method of each Group may be performed without knowledge of the steps or results of the method of any other Group. As the systems and programming code are those for performing the method(s) of each Group, the systems and code of each Group are also unrelated to those of any other Group for the same reasons as set forth for the methods.

Because these inventions are distinct for the reasons given above and the search required for Groups II-VIII is not required for Group I, the search required for Groups III-VIII is not required for Group II, the search for Groups I-II and VI-VIII is not required for Group III, etc., restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

All arguments with regard to rejections of record are held in abeyance pending response to this restriction requirement.

### **Conclusion**

Claims 1-509 are pending, and are restricted.
